

# How to embed NHS England's Continuing Healthcare films into your website

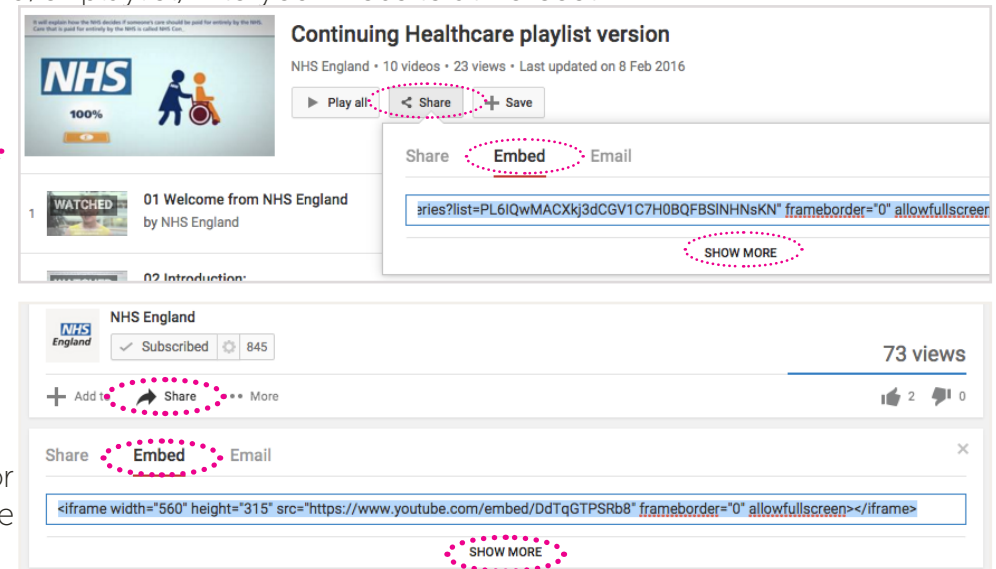

NHS England has worked with Greenwich CCG and Enabled City to create a national CHC film, to help explain the national policy framework better to people and families. You can embed either version (full length and/or playlist) into your website at no cost.

For the playlist version:

## Localising the film for your CCG

The CHC film can be localised for your own CCG, either by adding a local intro and close, and/or by adding interviews with your local CHC team staff, for which we would be pleased to provide further information on costs. Please see screen shots below of Greenwich CCG's films, with links to examples.
